nanocare

Foot and Fungi spray

- Nanocare's specially developed Foot Fungi spray to assist in illuminating athlete's foot and preventing fungi and/or bacteria including yeast infections form spreading.
- To be sprayed in shoe and sock as well as infected areas on foot.
- Foot Fungi can also be used to treat jock itch and ringworm.
- A fungal infection, also called mycosis, is a skin disease caused by a fungus. They live in the dirt, on plants, on household surfaces, and on your skin.
- Fungal skin infections can happen anywhere on your body. Spray on and let self-dry.

Quantum Nano Silver

Nanocare® Health & Wellbeing product Range are specially formulated, evidence based Nano Technology Solutions.

Foot Powder

- Nancare's specially developed Foot powder that is Talc free and NON - SCENTED.
- Contains a proprietary blend of Zinc, Topica Starch and Nanosilver.
- Assists in illuminating athlete's foot and preventing fungi and/or bacteria including yeast infections form spreading.
- The powder will keep your feet dry and eliminate moisture, preventing the spread of infection.
- Nanocare's Foot powder can also be used to treat smelly shoes , bacteria growth that can't be seen but smelt.

The science

- The science underpinning Nanocare is both ground-breaking and straightforward
  Our Nanocare's quantum-dotted Nano Silver is not the same as the colloidal or ionic silver used by your grandma.
- Our Nano Silver is made up of pure,active Nano Silver particles that are <20 nm in size that are quantum dotted onto natural carrier molecules (400– 580nm) to "deactivate" pathogens by preventing metabolic activities
- How small is a <20nm particle?A single human hair is made up of more than 4,000 <20 nm particles lined up side by side. Our Nano Silver is Non-Toxic and Cytotoxic due to its size.
